KSC/CCAFS HEALTH EDUCATION & WELLNESS PROGRAM: February 2005 Cardiovascular Disease Health

Many know that heart disease is the largest epidemic in the United States today. About 700,000 deaths are attributed to heart disease each year. In addition, about 85% of those who develop symptoms of heart disease have at least one known heart disease risk factor. In recognition of heart month, the February HEWP packet contains information regarding risk factors and basic prevention for cardiovascular disease. In addition, cholesterol terms and types of dietary fats are listed. The packet is available on the HEWP website: <http://sgs.ksc.nasa.gov/sgs/sites/other/chs/omehs/occmcd/home/index.cfm?page=hew>

Hardcopies of the packet will also be available at all medical and fitness facilities. If you or your department/organization would like to be added to the monthly packet hardcopy distribution list, please call Kris Calderon at 867-3414.
